KERVIN ODDYSEUS S. SARMIENTO

Aspiring Web / Software Developer
Iloilo City, Philippines | kosarmiento@usa.edu.ph | github.com/IkariShinjiii

SUMMARY

BSIT student building and deploying full-stack web applications with React, TypeScript and Supabase. Delivered a client e-commerce site with GCash payments and a capstone mental-health monitoring system with automated testing and accessibility compliance. Also builds Roblox games in Luau.

EDUCATION

University of San Agustin — Iloilo City
Bachelor of Science in Information Technology (BSIT), 3rd Year — College of Liberal Arts, Sciences, and Education

PROJECTS

Mind Bridge — Student Mental Health Monitoring and Support System — Capstone
React, TypeScript, Zod, Vercel, Render | Team of 2 | Repo: github.com/IkariShinjiii/Mind-Bridge

- Built a full-stack platform where students complete wellness check-ins and a transparent rule-based scoring engine flags low, medium, high and urgent risk for staff.
- Developed a confidential staff dashboard with case triage and filtering, analytics, account management and in-app appointment scheduling.
- Migrated the codebase to strict TypeScript with Zod validation on all forms and API endpoints; 270+ unit tests and 53 end-to-end tests passing.
- Audited against WCAG 2.1 AA; deployed frontend on Vercel and backend on Render.

ACUA E-Commerce Website with Custom Commissions — Client project
React, Supabase (PostgreSQL, Edge Functions, Row Level Security), PayMongo

- Built a storefront with customer and admin panels, and GCash checkout through PayMongo with webhook-confirmed orders.
- Implemented a quote-approval commission flow: customer request with reference images, admin-set quote, then 50% deposit and 50% balance payment gates.
- Handled 1-of-1 product locking after payment and secured data access with Row Level Security.

Clover Legends and Anime Simulator — Roblox games
Luau, Roblox Studio

- Built Clover Legends, a multiplayer PvP/PvE game: server-authoritative combat, spell and progression systems, DataStore saves with autosave, and boss and NPC AI.
- Designing Anime Simulator, a collection game with zones, co-op boss raids and offline earnings.

Personal Portfolio Website — In progress
github.com/IkariShinjiii

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Luau, HTML, CSS, SQL
Frameworks and Platforms: React, Supabase, Vite, Vercel, Render, Roblox Studio
Practices: Unit and E2E testing, schema validation (Zod), WCAG 2.1 AA accessibility, REST API design, Git and GitHub, payment integration

CERTIFICATIONS AND TRAINING

- Claude 101 — Anthropic (Certificate of Completion)
- Introduction to Cybersecurity — Cisco Networking Academy (Aug 2026)
- Getting Started with Cisco Packet Tracer — Cisco Networking Academy (Aug 2026)
- Networking Basics — Cisco Networking Academy (in progress)
